Because each transaction is initially recorded in a journal rather than directly in the ledger, a journal is called a book of original entry. A ledger (general ledger) is the complete collection of all the accounts and transactions of a company. The ledger may be in loose-leaf form, in a bound volume, or in computer memory.

The general ledger is not the only ledger in an accounting system. Subsidiary ledgers include selective accounts unlike the all-encompassing general ledger. Sometimes subsidiary ledgers are used as an intermediate step before posting journals to the general ledger. For instance, cash activity is usually recorded in the cash receipts journal.

Project accounting is a specialised form of accounting that corresponds to the ever-evolving needs of project delivery, which helps adequately track, report and analyse financial results and implications. This includes the practice of creating financial reports specifically designed to track the financial progress of projects, which can then be used by managers to aid project management.
