6. Structured Design - Software Engineering [Book]

In most scenarios of engineering design, depending on whether there is a need for performing the particular design task, a number of well laid-out steps are followed: (i) conceptual design in which one or more concepts are formulated and evaluated, (ii) embodiment design in which more concrete shapes and material of components are decided, and (iii) detail design in which all dimensions, parameters, tolerancing, etc. of the components are made usually with an optimization framework and with
