Vector Mechanics for Engineers: Statics Equilibrium of a Rigid Body in Two Dimensions 4 - 10 • For known forces and moments that act on a two-dimensional structure, the following are true: $F_z = 0$ $M_x = M_y = 0$ $M_z = M_O$ • Equations of equilibrium become $\sum F_x = 0$ $\sum F_y = 0$ $\sum M_A = 0$ where A can be any point in the plane of the body.

Vector Mechanics for Engineers: Statics Edition. 4 - 15. Equilibrium of a Two-Force Body • Consider a plate subjected to two forces F_1 and F_2 • For static equilibrium, the sum of moments about A must be zero. The moment of F_2 must be zero. It follows that the line of action of F_2 must pass through A. • Similarly, the line of action of F_1 must pass
