These foods have unique histories related to their production, consumption, and ultimately how they are used as vehicles to express identity. These themes of food sharing, the classifications of everyday vs. ritual foods, and the manifestation of cuisines outside of their sphere of origin will stand as our guiding principles as we students of ...

Exploring the power of food as a vehicle of identity

Counterfactual history (also virtual history) is a form of historiography that attempts to answer the What if? questions that arise from counterfactual conditions. As a method of intellectual enquiry, counterfactual history explores history and historical incidents by extrapolating a timeline in which key historical events either did not occur or had an outcome different from the actual ...

Although the rise of consumer culture and marketing in Britain and Europe have been studied extensively, less is known about developments elsewhere. Nevertheless, recent research suggests that China exhibited a rich history of early marketing practices; including branding, packaging, advertising and retail signage. From as early as 200 BCE, Chinese packaging and branding was used to signal ...

Models of collective behavior are developed for situations where actors have two alternatives and the costs and/or benefits of each depend on how many other actors choose which alternative. The key concept is that of "threshold": the number or proportion of others who must make one decision before a given actor does so; this is the point where net benefits begin to exceed net costs for that ...

Other psychologists are exploring the role of omega-3 fatty acids. Thanks to its anti-inflammatory properties and effects on dopamine and serotonin transmission, omega-3 has a role in brain development and functioning, with deficiencies linked to mental health problems, says Mary A. Fristad, PhD, of the Ohio State University Wexner Medical Center.
