A genius is a person who displays exceptional intellectual ability, creative productivity, universality in genres, or originality, typically to a degree that is associated with the achievement of new discoveries or advances in a domain of knowledge.Geniuses may be polymaths who excel across many diverse subjects or may show high achievements in only a single kind of activity.

Genius - Wikipedia

Statistics, in the modern sense of the word, began evolving in the 18th century in response to the novel needs of industrializing sovereign states.The evolution of statistics was, in particular, intimately connected with the development of European states following the peace of Westphalia (1648), and with the development of probability theory, which put statistics on a firm theoretical basis.

History of statistics - Wikipedia

The Indiana Daily Student is an independent student newspaper covering Indiana University, IU sports and the city of Bloomington, Indiana.
