For example, two of the most popular effects are the Fulltone OCD Obsessive Compulsive Overdrive Guitar Effects Pedal and the Ibanez TS9 Tube Screamer Effects Pedal - these are both overdrive pedals, and together with a good amp, they'll take an electric guitar's sound from its default, vintage-like tone all the way to the high-powered distortion of a modern rock anthem.

Amplifiers & Effects | Guitar Center

Fuzz pedals make your guitar sound like its pushing your amplifier to the point of blowing up. A fuzz pedal completely changes the sound of your guitar signal into a heavy, fizzy, and extremely noisy sound that, depending on which pedal you choose, can provide a bass heavy noise, to a spitting 'broken' amp sound.

Beginners Guide To Guitar Effects Pedals - PMT Online

The effects loop was designed to insert effects from either a pedal or processor into a predetermined position in an amplifier. This prevented time based or modulation effects like reverb, delay, chorus or flangers from getting altered in a pre-amp designed to distort.
