How Grammaticalization Processes Create Grammar

Simply put, grammaticalization is the process in which a lexical word or a word cluster loses some or all of its lexical meaning and starts to fulfil a more grammatical function. Where grammaticalization takes place, nouns and verbs which carry certain lexical meaning develop over time into grammatical items such as auxiliaries , case markers , inflections, and sentence connectives .

Grammaticalization - Wikipedia

In its broadest sense, grammaticalization, also known as grammaticization, is the process by which grammar is created (Cro 2006: 366), or the study of this process. The term is thought to have originated with Meillet (1958, but first published 1922) who was interested in identifying how new categories and system changes arise.

Luraghi 15 Fpp

Grammaticalization has to do with the diachronic relationship between the lexicon and grammar and with stages of relatively greater and lesser grammaticality.

Grammaticalization | Request PDF

For most students of the field, grammaticalization is understood to be a diachronic process and, hence, findings can be verified or falsified by means of historical evidence. But it is also possible to analyse grammaticalization phenomena within a synchronic framework.

Introduction - Oxford Handbooks

The English *go* future, a quintessential example of grammaticalization, has shown layering with *will* since at least 1490. To date, most synchronic evidence for this development comes from dialects where *be going to* represents a sizable proportion of the future temporal reference system. However, in the United Kingdom in the late twentieth century there were still dialects where *be going to* was ...
