If you want to know about the real safety risks in a port, it makes sense to ask the people at the sharp end – and that means everyone. But that's not enough; you also have to create a culture in which everyone, whoever they are, feels able to raise safety issues in a non-critical environment and confident that their concerns will be acted on.

...

Therefore if there is a failure at the sharp end, if you only look at the sharp end you only get part of the story. After an accident or some other type of failure our default reaction is to find someone to blame and punish. Often this is the worker at sharp end. That is, unless the failure is well-publicized.

There are tremendous opportunities and challenges in improving the quality and safety of health care, but the majority require purposeful redesign of health care organizations and processes. Organizations that are committed to high-quality and safe care will not place nurses at the “sharp end” of care, but will focus on system improvements.

Active failures are unsafe acts (errors and violations) committed by those at the “sharp end” of the system (e.g. anaesthetists, surgeons, nurses). They are the people whose actions can have immediate adverse consequences. Latent failures are created as the result of decisions taken at the higher echelons of the organisation.
