In The Science Delusion: Freeing the Spirit of Enquiry (published in the US as Science Set Free ), Rupert Sheldrake shows the ways in which science is being constricted by assumptions that have, over the years, hardened into dogmas. Such dogmas are not only limiting, but dangerous for the future of humanity. According to these principles, all of reality is material or physical; the world is a machine, made up of inanimate matter; nature is purposeless; consciousness is nothing but the ...

I believe that the sciences will be regenerated when they are liberated from the dogmas that constrict them, as I show in my book The Science Delusion (called Science Set Free in the U.S.). Many new lines of research become possible when we abandon the idea that we already know the answers in principle, leaving only the details to be filled in.

The Science Delusion: Freeing the Spirit of Enquiry. After Richard Dawkins' The God Delusion comes the reply. Wham bam! Rupert Sheldrake takes on the "truth-finding religion" of science in general and "ten dogmas" of the 21st-century worldview in particular. These include arguments that consciousness is "a by-product" of the biochemistry of the brain; that evolution is purposeless; that God is only an idea.
