Edgewater water is disinfected with both UV and chlorine and is stored at the Hewitt Road reservoirs, which provide 1200m<sup>3</sup> of treated storage. The RDEK has the capability to fully monitor the entire process through Edgewater's Supervisory Control and Data Acquisition (SCADA) system which alerts the operators of any potential problems.

Water supply systems get water from a variety of locations after appropriate treatment, including groundwater (), surface water (lakes and rivers), and the sea through desalination. The water treatment steps include, in most cases, purification, disinfection through chlorination and sometimes fluoridation. Treated water then either flows by gravity or is pumped to reservoirs, which can be ...
